REPORT

WORKSHOP ON E-WASTE MANAGEMENT

HOW TO REDUCE E-WASTE

DATE -18-1-23

Eco cell conducted the Workshop on E waste management at LLDIMS campus. The aim of the workshop was to spread awareness about e-Waste Management for creating awareness about reduction of E-Waste management for BBA and BCOM (Hon.) students. Workshop was headed by Ms. RoopalRamawat , faculty of EVS from BCOM department. Workshop was very fruitful for the students they got benefitted by this workshop, learned about E-waste and various methods and techniques for the reduction of E- waste. The activity is conducted in Mishra Classes Chattarpur.

E-waste is any electrical or electronic equipment that has been discarded. This includes working and broken items that are thrown in the garbage or donated to a charity reseller like Goodwill. Often, if the item goes unsold in the store, it will be thrown away. E-waste is particularly dangerous due to toxic chemicals that naturally leach from the metals inside when buried. E-waste is electronic products that are unwanted, not working, and nearing or at the end of their "useful life." Computers, televisions, VCRs, stereos, copiers, and fax machines are everyday electronic products. The ongoing challenge of how best to dispose of used and unwanted electronics is not a new one and dates back at least to the 1970s. But a lot has changed since then, particularly the number of electronics being discarded today. We also have something else today: a term for this issue. After several terms got suggested, including "Digital rubbish," a consensus formed around the simple word "e-waste."

REPORT

NATURE WALK

DATE – 2nd May ,2023

Eco cell organizes the nature walk for BBA and BCOM(Hon.) students on 2nd May to BOTENICAL GARDEN Noida for creating awareness about nature. A Botanical Garden is a collection, cultivation, and display of a wide range of plants labelled with their botanical names. Ex situ conservation involves conservation of plants and animals in artificial habitats, which are quite like the normal habitats of these organisms. Botanical Gardens provide ex situ conservation of germplasm, and are uniquely positioned to help address the issues relevant to restoring ecosystems. They provide knowledge and expertise in plant taxonomy.
