A VISIT TO AMAR JYOTI SCHOOL (2018)

A visit to Amar Jyoti school was organized for students of Bachelor of Education programme. The students were accompanied by Dr Amruta Panda and Mr Masroor Hasan.

The visit was organized for the whole day under the purview of a compulsory paper for Students of Semester IV, Inclusive Education. The school is an example of an inclusive set up where students with disabilities such as visual, hearing impairment, mental retardation, learning disability, multiple disabilities study together. The trustee of Amar Jyoti foundation welcomed the students and faculty with and explained that the entire campus is accessible to all. It has tactile path, ramps, loop induction and disabled friendly bus for school students.

The President of India gave the National Award to Amar Jyoti Charitable Trust for creation of barrier free environment. The Amar Jyoti school also has building entirely devoted to medical care & rehabilitative services provided on the premises to which the school students as well as the outsiders are welcomed. These include Physiotherapy and Occupational Therapy Departments, Speech Therapy and Audiology Unit, Prosthetic and Orthotic Workshop which provides and repairs assistive devices for Amar Jyoti school children as well as other beneficiaries, Dental Care Unit, Ophthalmologic Care unit, X-Ray Unit, Pathology Laboratory, Operation Theatre, Homeopathy, Endocrinology, Diabetes and Obesity and Dietary Clinic etc.

NATURE WALK

DATE-14-08-2018

Eco cell LLDIMS organizes nature Walk for BBA and B.Com. (Hon.), students visit to botanical Garden Noida. Nature walk was held on 14 august 2018. Doing a nature walk is not only about celebrating Earth Day. It's also an opportunity for learning experiences in a variety of subjects such as science, geography, math, and art. A nature walk is exactly what it sounds like-you go for a walk outside and see what you find. No pressure! It is preferable to find a place that is far away from street noise or even playgrounds so that students can really pay attention to the sounds they hear in nature

Each nature walk offers something different for students to explore – even if you walk the same trails from one day to the next. If you live in a colder climate, the changing seasons can be another great way to observe plants and animals as the weather shifts. Such experiences can be exhilarating, fun, and inspirational. We often hear students say, when we go outdoors, we don't really know we're doing it, but we're actually learning math, doing science, and practicing English, so it's just making it educational and fun at the same time.

Report on women cell workshop on Safety and Self Defense

A two-hour awareness campaign / workshop for college girls on sexual assault and harassment and a workshop on self – defense held in Lingaya's Lalita Devi Institute of Management and sciences on 18th September, 2018

The two – hour long workshop had a demonstration on self-defense techniques for girls, which is of great help to them in time of crisis. **Mr. Chandan Singh** head of PCR Van organized a self – defense workshop for the girls, he said added that such workshops are holding across the country and this year, the focus was on the district headquarters in the state.

The organizers taught the girls many self-defense tricks and techniques to develop confidence in them.

Orientation and discussion were held on safety precautions at road, home school, public place and also while using internet. They also mentioned that they want women and girls to be able to know what to do when faced with assault, be it at the workplace, on the streets or even at home, and also self-defense not requires years of practice to get right and might not look very elegant but can dramatically increases your chances of coming out of a sticky situation, safe.

Apart from teaching us tricks and tips on how to solve ourselves in (SOS) situations, through demonstration as well as case – study of sexual assault they are keen on educating women and girls about basic rights also like filling FIRs etc.

The demonstration session:

- ❖ Prevention is the best self defense
- ❖ Get loud and push back.
- ❖ Remember the most effective body parts to hit
 - Eye

- Nose
- Neck
- Knee
- Use your elbows, Knee and Head
- Use everyday objects- pin, perfume, pen, etc.

Different techniques to self defend against different forms of attacks:

- ❖ Wrist hold
- ❖ Stop on outside strike
- ❖ Escape a bear hug
- ❖ use of hand edges to counter strike an attacker

The learning outcomes from the workshop on self-defense are the we learnt about different kinds of violence that may be faced by girls or women in any place including at home. The volunteers got different self-protection tips on how to avoid by attacking a potential attacker by using objects or by striking on the soft spots of the attacker.

POSTER MAKING COMPETITION ON SAVE THE EARTH

Eco cell organizes the poster making competition on the theme of save the earth for BBA and BCOM(Hob.) students. The competition was held on **15 Jan 2019** Earth and the resources of earth make life possible on it. If we were to imagine our lives without these resources, that would not be possible. As life cannot function without sunshine, air, vegetation, and water. However, this is soon going to be our reality if we do not save the earth now. We should save the mother earth so that our future generations can live in a safe environment. We can save the earth by **saving trees, natural vegetation, water, natural resources, electricity, etc.** We should strictly follow all the possible measures to control the environmental pollution and global warming.

Earth is our planet and a most important need for the continuity of life. It is full of all the basic resources to continue a life however; it is getting declined continuously because of some unethical behavior of the human being. Save earth is a slogan used to spread awareness among people about the importance of earth and why we should save our mother earth. Save earth slogan motivates people to save earth and its natural resources to give our future generations a safe and healthy environment. Everything essential that we need today has been provided to us by the earth. Water, air, food, shelter, earth gives us all of it, sustaining our lives. But the problem is that we neglect the damages that we are causing to the earth, due to our own activities, though, they are going to harm us only. The most prominent threat to earth is pollution caused due to several human activities. The slogan "Save Earth" tries to persuade people like you and me to take necessary steps for the protection of earth and its environment. However small the contribution is, it will definitely be the beginning of a change that we want to see.

DOCUMENTARIES ON INDIAN CRAFT TRADITION AND ITS RELEVANCE IN EDUCATION

Various Documentaries on Indian craft Tradition was shown by Ms. Anjali Bhardwaj on 7th April, 2020 to the B.Ed. students. The discussion focused on how the crafts can be promoted in a manner that makes them relevant to the contemporary world. There is a demand in the international market for these traditional items but the local market too needs to find a place for them, it was felt. While the merits of redefining these arts to make them appealing to a different market are many, it is essential to ensure that not just the skill, but the culture of the craft as a whole, survives of appeal of any craft, students made an interesting point that each craft has a defined locus, which is what makes it a live reality.

GUEST LECTURE ON LIFE SKILLS

Department of Education organizes guest lecture by Dr. Vikas Baniwal on the topic life skills on 17th April, 2020. He began the session with a 'Namaste' and went on to elaborate the importance of taking pride in one's own mother tongue. He challenged the conventional dominance of English in the corporations by taking examples of countries such as Japan that are doing as good as any English-speaking country even though they are using their native language. He thereafter took the students on a journey of the early days of his career. He talked about his initial days in Corning and how he gradually worked his way up the career ladder to become an Educationalist. He shared the challenges that he faced and the lessons that he learned.

Dr. Vikas Baniwal highlighted three major components of growth-physique, mental state and soul. It is important to feed each of these for one's overall success. We need food and exercise to maintain our physique, while knowledge is the food for the brain. The soul needs the divine blessing for its growth. The fourth component of growth is having the right attitude. This results from being fearless, which is in turn rooted in having faith in your own abilities. He used various analogies to explain the importance of these attributes in determining a person's growth.

E-Workshop on Personal Capacity Building

BY: The National Commission for Women, Delhi

Lingaya's Lalita Devi Institute of Management and Sciences (Approved and affiliated by GGSIPU and Govt. of NCT of Delhi) in collaboration with National Commission for Women, Delhi organized a workshop on Personal Capacity Building. The meeting was held for all female students from first to final years across all courses. The meeting had a strength of over 200+ female students and at the beginning itself, the students were briefed about the three aspects that were to be elaborately covered in the workshop.

The three aspects were as follows: -

1. Listening Skills and Brainstorming.
2. Time Management and Stress Management.
3. Internal Communication and Group Discussion.

Out of these three aspects, Dr. Manju Sharma explicated upon "Listening Skills and Brainstorming", which was followed by Dr. Sangeet Sharma covering "Time Management and Stress Management." Additionally, there was a brief mention about the Women's Cell of LLDIMS, which was installed in 2010. Students were made familiar with the objective of the E-Workshop- the welfare of all females.

As the workshop marked its onset, Dr. Manju Sharma kickstarted the event by laying due emphasis upon the vitality of good communication skills that aid an individual in seeking employment, sitting for placement interviews, and in fostering good interpersonal relations with others. She validated how a person should eloquently express his or her viewpoints and ideas coherently and how one can strive to become an effective listener, in turn. With the help of an informative PowerPoint Presentation and pictorial representation in the form of diagrams, she figuratively linked the significance of a bulb and a brain (how due to the flowing of electric currents, the bulb remains lighted. Similarly, due to the free-flowing of ideas, pupils' brains get ignited with a spark, and their original and creative ideas help in shaping their cognitive capacities.) Dr. Manju Sharma further elaborated upon body

language, speaking techniques, good organizational skills, mind mapping, and paraphrasing. She made her interaction interesting through various illustrations and by encouraging participation.

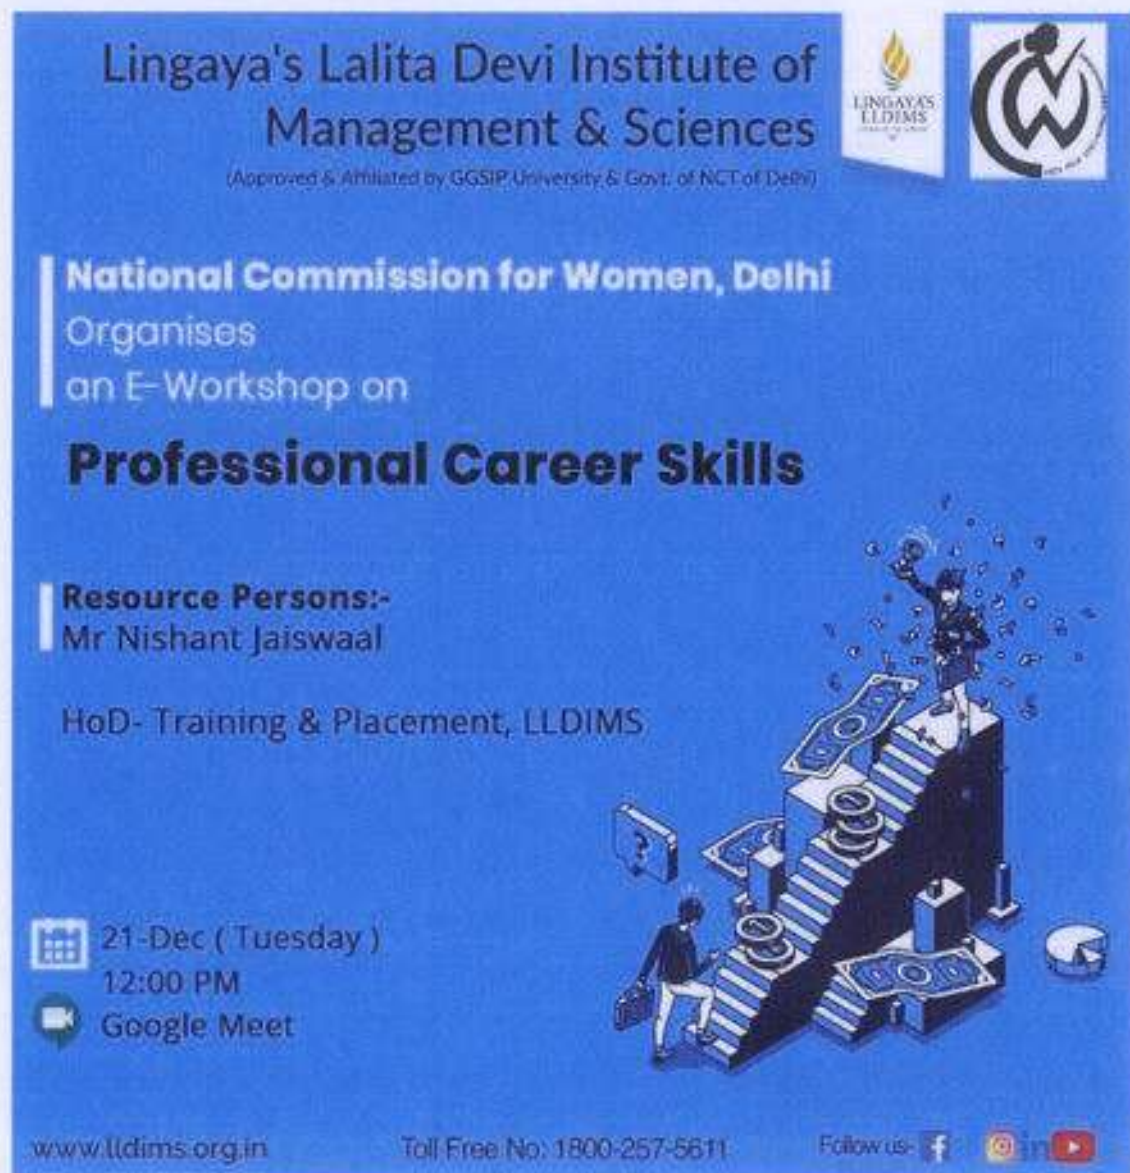

Next in line was Dr.Sangeet Sharma who initiated "stress management" by conducting a LIVE demonstrative exercise in which he asked the attendees to sit straight, lift their eyes a little, and give a big smile. The purpose of this exercise was to explain to the students the pattern in which stress adversely affects bodily postures, eating habits, mental abilities, etc. A lot of students took interest and asked him various questions, to which he promptly responded. He compared the journey of life to a Radio FM Station to describe that life is a journey and not an end process. He explained how certain concepts are closely intertwined: feeling-action-behavior-result. Then, he moved on to "time management", which is essentially self-management. Dr.Sangeet Sharma articulated the impediments that come in the way of self-management, like procrastination- one's biggest foe and not prioritizing important tasks. Overall, his session was quite interactive marked by the keen participation of students. All in all, the E-workshop commenced on a fruitful and expanded the horizons of each student.

NATIONAL COMMISSION FOR WOMEN, DELHI ORGANIZED AN E WORKSHOP ON DIGITAL LITERACY ON 27 DEC 2021

LLDIMS in collaboration with National Commission for Women, Delhi organised an e-workshop on Digital Literacy on the below meeting link: <https://meet.google.com/zxh-tuub-gox>. In light of the current challenging times there has been a shift in teaching learning from Information Communication Technology (ICT) supported to ICT integrated, and thus online learning should not be merely regarded as an alternative but as a necessity. In view of this Department of Education (DOE) organized a one day workshop on the theme "Digital Literacy – Tools and Techniques" on 27th Dec 2021, under the ace leadership of Dr. Mala Dixit and Ms. Ghazala Khatoon. The two hour workshop, organized by Dr. Mala Dixit and Ms. Ghazala Khatoon, was held on 27th Dec 2021 via Google Meet Video-conferencing virtual platform. It was attended as the most awaited capacity building or skill enhancement opportunity by about 100 pupil teachers, educators and faculties. The workshop began at 10 with a discussion on the relevance of ICT in the contemporary context.

The Department of Education conducted the workshop on 27th Dec 2021. The National Commission For Women (NCW) played an important role by supporting this workshop on Digital Literacy. Overall, workshop was well received, applauded and had been a rich learning experience for all the participants, who also requested for more such capacity development workshops in future also. Undoubtedly, successful facilitators and educators in the future would be digitally literate and ICT skilled.

Dr. Mala Dixit and Ms. Ghazala Khatoon and all the other participants were very grateful to the DOE for successfully hosting the workshop as it significantly improved their knowledge on the paradigm change in ICT integrated learning.

E- ACTIVITY ON INTERNATIONAL ENERGY CONSERVATION DAY

The B.ED department of LLDIMS conducted a meeting which focused on the awareness of the students about the International Energy Conservation, which is observed on 14th December each year. It was coordinated by Ms. Rohini Jain on 16th December 2021. It focused on making people aware about Global warming and climate change, promoting efforts towards saving energy resources. Awareness about the Earth Hour which is a worldwide movement organized by World Wide Fund for Nature was spread among students. Similar to this, B.Ed department organized an activity for students through which they had to turn off all the lights and other electrical appliances at night from 09 PM to 09:10 PM. As students were aware about the importance of energy conservation, they were excited and enthusiastic enough and keenly participated in the activity.

The institution as well as the students warmly welcomed the initiative and activities conducted for the environmental conservation. Bachelor's Of Education department proudly organized the activity and contributed effectively towards our Mother Earth.

SOCIALISATION THROUGH FOLKLORES (ONLINE ACTIVITY)

Socialization is the lifelong process through which people learn the values and norms of a given society. Socialization is strongly connected to developmental psychology. Humans need social experiences to learn their culture and to survive. Folklore can produce a feeling and a strong sentiment towards culture and unity. What is more interesting and unique is, this sentiment is devoid of disadvantages and criticality of patriotism and competitive nationalism.

Keeping the significance of Socialization in mind E- workshop was conducted by **Dr Jyoti Dahiya** on "Socialization through folklores" on 15th February 2022 at Lingaya's Lalita Devi Institute of Management and Sciences. Students of b.ed semester 2nd participated in this online workshop. Many activities were performed by Students (Story narration, Folksong, Folktales) All of these were showcased to all the students and teachers through Live Online Google meet held at 1:00 a.m.

PRESENTATION AND GROUP DISCUSSION ON AWARENESS DRIVE ON WORLD WILDLIFE DAY

On 3rd May 2022, The Department of Education, LLDIMS organized **Presentation and Group Discussion on Awareness Drive on World Wildlife Day**. The coordinator of this programme was Ms. Rohini Jain, Assistant Professor, Dept. of Education, LLDIMS. The programme was started at 12:00 noon. Students from 1st year and 2nd year of B.Ed. actively participated. Students of each House prepared two presentations. Students made attractive and informative PPTs and explained them. The Students focused majorly on the introduction and the history of this special day and emphasized on the significance of this day and the key theme this year, that is, "Recovering Key Species for Ecosystem Restoration". The students prepared a PPT to spread awareness about this day and how it creates opportunities to highlight the solutions we have built for a sustainable future. The students raised awareness about threatened and endangered plants and animals. Further, the students of enlightened everyone about the need and significance of wildlife conservation. The coordinator appreciated everyone's efforts to make this session a great one and the session eventually came to an end.

ESSAY WRITING COMPETITION

EARTH DAY

22 April 2022

Earth Day is an annual celebration that honors the achievements of the environmental movement and raises awareness of the need to protect Earth's natural resources for future generations. Earth Day is celebrated on April 22 in the United States and on either April 22 or the day the spring equinox occurs throughout the rest of the world. For Earth Day 2022, we need to act (boldly), innovate (broadly), and implement (equitably). It's going to take all of us. All in. Businesses, governments, and citizens — everyone accounted for, and everyone accountable. A partnership for the planet. Eco cell organises essay writing competition on earth day for B.com (Hons.) students

ESSAY WRITING COMPETITION

ECOLOGICAL FOOTPRINT VS POLLUTION

DATE -21-07-2022

Eco cell organizes Essay writing competition on the topic of ecological footprint vs pollution on 21 July for BBA and BCOM (Hon). Total no.16. of students participated in competition.

The simplest way to define ecological footprint would be to call it the impact of human activities measured in terms of the area of biologically productive land and water required to produce the goods consumed and to assimilate the wastes generated

Every day the world around us is changing ever so slightly in many different ways. Humans can affect the environment through our day-to-day lifestyle without even noticing the change. An ecological footprint is a measurement of how much a person uses the environment around them to live their life. This given measurement can help one to see their impact on the earth. It is an important tool to understand what actually a human does to

change the habitat near them. My ecological footprint results gave me a perspective of how my daily life can impact the world I live in, as well as, how I as an individual can change my actions to make less waste on earth. It is also useful for each person to know their own ecological footprint since no one lives.

List of the students who were participated

WORKSHOP ON E-WASTE MANAGEMENT

HOW TO REDUCE E-WASTE

DATE -18-1-23

Eco cell conducted the Workshop on E waste management at LLDIMS campus. The aim of the workshop was to spread awareness about e-Waste Management for creating awareness about reduction of E-Waste management for BBA and BCOM (Hon.) students. Workshop was headed by Ms. RoopalRamawat , faculty of EVS from BCOM department.

DIRECTOR
LINGAYA'S LALITA DEVI INSTITUTE
OF MANAGEMENT & SCIENCES
MANDI ROAD, MANDI
NEW DELHI-110047

Workshop was very fruitful for the students they got benefitted by this workshop, learned about E-waste and various methods and techniques for the reduction of E- waste.

E-waste is any electrical or electronic equipment that has been discarded. This includes working and broken items that are thrown in the garbage or donated to a charity reseller like Goodwill. Often, if the item goes unsold in the store, it will be thrown away. E-waste is particularly dangerous due to toxic chemicals that naturally leach from the metals inside when buried. E-waste is electronic products that are unwanted, not working, and nearing or at the end of their "useful life." Computers, televisions, VCRs, stereos, copiers, and fax machines are everyday electronic products. The ongoing challenge of how best to dispose of used and unwanted electronics is not a new one and dates back at least to the 1970s. But a lot has changed since then, particularly the number of electronics being discarded today. We also have something else today: a term for this issue. After several terms got suggested, including "Digital rubbish," a consensus formed around the simple word "e-waste."

DISCUSSION ON WETLANDS

WORLD WETLAND DAY

2ND February 2023

Wetlands are those areas where the soil is covered with water or can be present near the ground throughout the year. It supports both terrestrial and aquatic species. They vary widely depending on the climate, soil, vegetation, hydrology, chemistry, and human disturbance. These areas can be found from the tundra to the tropics apart from Antarctica. The water found in the wetland is of two types. It is either brackish, saltwater, or freshwater.

Eco cell LLDIMS organises a healthy discussion on wetlands for creating awareness. This activity was held on 10.2.2023 for B.com (Hons.) students. Activity coordinated by Ms. HeenaMansoori.

Sustainability

Awareness Campaign on "Khelo Holi Naturally"

Eco cell of Lingaya's Lalita Devi Institute of Management and Science (LLDIMS) organized an awareness campaign on "Khelo Holi Naturally" on 6th March, 2023 to generate awareness on safe Holi.

The event was organized by the students of Journalism and Mass Communication to put forward their views about the concept of playing Holi with herbal colours. Several posters related to safe Holi were prepared by the students to raise awareness towards the harmful impact of synthetic colours.

The activity was organized with the objective to sensitize the students towards the growing use of chemical induced colours which not only effect the environment, but also creates several health hazards.

The event was an important measure taken by the students as part of Eco Cell activity to create awareness towards harmful impact of chemical based colours and the benefits of playing Holi with eco-friendly colours.

ECO CELL ACTIVITY – CLEANLINESS DRIVE ON SAY NO TO PLASTIC, 28.4.23

The ECO CELL, LLDIMS in association with the Environment Department, GNCTD, today organised a Campaign on the theme "Say No to Plastic" on 28.4.23. It was conducted by the students of the Education Department, doing B.Ed. who showed full strength 100 % participation in this activity. Students made informative colourful posters to express their views on this theme and displayed jute bags and cloth bags as alternatives to plastic. Students also organised a Cleanliness campaign on the theme of reducing litter in spaces around us. LLDIMS has always motivated students to become aware and responsible citizens of the society. This activity was another step in this direction. The activity was graced by the college authorities and it was organised by Ms. Rohini Jain, Eco Cell Coordinator, LLDIMS.

NATURE WALK

DATE – 2nd May, 2023

Eco cell organizes the nature walk for BBA and BCOM(Hon.) students on 2nd May to BOTENICAL GARDEN Noida for creating awareness about nature. A Botanical Garden is a collection, cultivation, and display of a wide range of plants labelled with their botanical names. Ex situ conservation involves conservation of plants and animals in artificial habitats, which are quite like the normal habitats of these organisms. Botanical Gardens provide ex situ conservation of germplasm, and are uniquely positioned to help address the issues relevant to restoring ecosystems. They provide knowledge and expertise in plant taxonomy.

Activity 1: Plant Distribution for a Green and Sustainable Environment (5th July 2023)

Activity 2. Quiz Competition on World Nature Conservation Day (26.07.2023)

1. Plant Distribution for a Green and Sustainable Environment

The Department of Education, LLDIMS, organised a Plant Distribution activity for our students, for a Green and Sustainable Environment on 5.7.2023 in the college campus. The Students were given a brief orientation about the need for a Green and Sustainable Environment and how planting of trees helps in this. Students were distributed plants and were requested to plant them in their home or area nearby. Awareness was created in the students for increasing greenery in our environment and makes it sustainable.

2. Quiz Competition on World Nature Conservation Day (26.07.2023)

Department of Management, LLDIMS organized Quiz competition on 26th July 2023 to celebrate World Nature Conservation Day for Department of Management students. The event, hosted by Pragya Rani, a 2nd Year student, was initiated and skilfully organized by the BBA students under the expert guidance of Dr. Alka Singh, a distinguished member of the Eco Cell at LLDIMS. The primary objective of the competition was to raise awareness about environmental conservation and sustainability while fostering healthy competition among the participants. The quiz competition saw active participation from 40 enthusiastic students, all eager to showcase their knowledge and passion for environmental issues. The participants were divided into 6 teams were thoughtfully formed to ensure a fair and equal distribution of talent and knowledge across all groups. The competition consisted of three challenging rounds, carefully designed to test the participants' understanding of various aspects of nature conservation and environmental awareness. After three intense rounds of quizzing, Team B, represented by Nancy and Rohan, emerged as the triumphant winners.
