Industry Innovation

Vansh - BBA 2023

India has seen a significant rise in innovation, particularly in technology and manufacturing sectors. The country's tech industry, led by software giants like Tata Consultancy Services (TCS) and Infosys, is a global leader. The emergence of startups, especially in cities like Bengaluru, Hyderabad, and Pune, has made India the third-largest startup ecosystem in the world. Innovations in fintech, healthtech, and agritech are particularly noteworthy.

The government's support for innovation is evident through initiatives like Startup India, which provides tax benefits, easier compliance, and a conducive environment for startups. Additionally, the Atal Innovation Mission (AIM) promotes a culture of innovation and entrepreneurship, focusing on school-level innovation programs and incubators.

Infrastructure Development

Vani - BBA 2022

Infrastructure development is pivotal for India's economic growth. The government has undertaken massive infrastructure projects, including the development of highways, railways, airports, and urban infrastructure. The National Infrastructure Pipeline (NIP) aims to invest \$1.5 trillion in infrastructure over the next five years.

Key projects like the Bharatmala Pariyojana for road development, the Dedicated Freight Corridors (DFCs) for railways, and the UDAN scheme for regional airport connectivity are transforming the country's infrastructure landscape. Smart Cities Mission is another ambitious project aiming to develop 100 smart cities with state-of-the-art amenities and sustainable urban planning.

India's Innovation and Infrastructure

Mayank - BBA 2021

India's transformative journey in industry innovation and infrastructure development is marked by advances in the tech sector and a vibrant startup ecosystem in cities like Bengaluru and Hyderabad. Government initiatives like Startup India and Atal Innovation Mission support this growth. Major infrastructure projects, including the National Infrastructure Pipeline, Bharatmala Pariyojana, and Smart Cities Mission, are pivotal. Programs such as Make in India, Digital India, and Atmanirbhar Bharat boost manufacturing and self-reliance. Despite challenges in investment, regulation, skills, and sustainability, technological advancements and public-private partnerships promise a bright future for India's economic leadership.

Topic: "Personality Traits & Competencies of an Entrepreneur"

Conducted by: Mr. Praveen Kapoor, Co-founder of BeBoss Technology.

Date: 30.4.2024

Mr. Kapoor, a seasoned entrepreneur, shared insights on the essential traits and competencies needed for entrepreneurial success. Participants gained valuable knowledge on resilience, leadership, innovation, and adaptability, crucial for navigating the dynamic business landscape.

Seminar on “How to be a Compliance Manager” on 3rd April, 2024

A session on compliance management was conducted by CAs Nitin Anand and Vishal Varshney on April 3, 2024. They highlighted the key responsibilities and skills required to excel in the role. The session emphasized the importance of staying updated with regulations and fostering a culture of compliance within organizations. Attendees gained insights into risk assessment, regulatory frameworks, and effective communication strategies essential for success in compliance management.

Fire and Safety Summit organized by the PHD Chamber of Commerce

Date: 2nd May, 2024

Students from our BBA and BCom (H) programs had the opportunity to participate. It was an incredible event filled with insights and knowledge. We had the honor of meeting some truly remarkable speakers, and lionising with industry experts from Indian Oil Adani Gas, GAIL, DMRC, Delhi Fire Services & DIG (Fire) CISF-Govt. of India, Delhi Disaster Management Authority and so on. Their wealth of knowledge and experience added immense value to the discussions, covering various aspects of fire safety and management.

Both BBA and BCOM (H) programs address risk management and business operations. Learning fire safety protocols aids in managing organizational risks, ensuring compliance with safety regulations, and aligning with corporate social responsibility goals through enhanced workplace safety practices.
